

Photoshop: Artistic Filters

Directions: You are going to use your creativity to create unique pieces of art. Follow the steps below to aid in your artistic freedom.

1. Open up Photoshop.
2. Open up the practice photos from the THS_Students drive > Ms. Kozak > Artistic Filters.
3. In the LAYERS PALETTE make FOUR copies of the Background layer.
4. Once your file is open, go to FILTER > ARTISTIC > COLORED PENCIL.
5. This is where you are going to explore your creativity.
6. In the new FILTERS window in the LOWER LEFT CORNER zoom out until you see the entire image.
7. Now CLICK on the GRAY BARS towards the center of your screen to expand your options.
8. Start to click on each type of filter and play around with the slider options to the right to see what the effects will be.
9. Once you are happy with an outcome, HIT OK in the upper right corner to go back to Photoshop.
10. RENAME this layer AFTER THE ARTISTIC FILTER YOU USED.
11. Click on another background copy layer and start again with the artistic filters. This time choose different filters than before.
12. Repeat steps 4-11 until you have used all 4 of your Background copy layers.
13. Now play around with each layers OPACTIY and LAYER ORDER until you get the desired effect.
14. Save this as ARTISTIC 1 in your Quarter 2 > Photoshop Projects folder as a PSD.
15. Finally you are going to choose a photo of your own (one that you took) to apply artistic filters to.
16. Save this as ARTISTIC 2 in your Quarter 2 > Photoshop Projects folder as a PSD.

Selected Artistic Filters

Directions: Now you are going to get even more creative with filters on one of your own images...follow the directions below to achieve a unique effect.

1. Open up Photoshop.
2. Go to FILE > OPEN and look for one your image to use. Make sure you have a few different things going on in the picture.
3. Using the PEN tool make a selection around one of your areas you would like to change.
4. Go to FILTER > ARTISTIC > COLORED PENCIL to open up the filters window.
5. Choose a filter you want to use for that specific area, you can manipulate the sliders to the right to get different effects as well.
6. Once you get it to where you want click OK to apply that filter.
7. Then go SELECT > DESELECT.
8. Repeat steps 3-7 until your entire image has different filter effects, I am looking for at least 5 different filters that are on your image.
9. When you are done, go to FILE > SAVE AS > save this as ARTISTIC SELECTED and make sure your file format is PHOTOSHOP or .PSD
