

Powerspelling Requirements

1. Students must have a signed COPPA form giving consent, on file. The COPPA form is a form that is a part of their returning or new student registration through Infosnap.
2. When creating/uploading student accounts please use student first name, student last initial if at all possible.
3. Usernames and passwords are generated by the program when students are uploaded.

The teacher can go into each individual student and change the generated username and password as long as the username and password contain no personal identifiable information. You may want to consider using their Twinsburg network login and password.
