

Quizizz Requirements:

Students do not need to sign up (create accounts) to use Quizizz to take quizzes.

They can take a quiz by clicking Join a Game and then entering the code of the quiz created by the teacher.

It is recommended that students don't make accounts unless they will be using the tool to create quizzes.

If teachers have students create accounts:

1. Student must have signed COPPA form on file giving consent
2. Students must use their school Google account to login or sign up
3. If students do not use their Google account but instead create an account using their school email and are under 13, they will be required to enter a parent email. Therefore the attached permission slip must be sent home allowing the student to use the parent email.
