

The following tool has been approved and can be used contingent on the following requirements:

Tool: Quizlet

Requirements:

1. If the study set you created for students is shared through the short URL or through google classroom in an assignment, announcement or question, no permission slip is necessary because students do not need to create an account to do the study set.

The primary advantage of students creating accounts is that very limited progress can be seen. Detailed class progress is available for an additional cost.

2. A permission slip is needed if students 13 and under create an account to join a class and/or make their own sets, because first name, last name, student date of birth and parent email address are required for the student to create an account.

3. DO NOT have students (13 and younger) sign up with their school Google Account.

4. For children over 13 the preferred method of sign up is through their school Google Account.

Attached is the permission slip that will need to be sent home, signed and returned for each student if they are going to make an account.

Also, attached is how to share a study set with students without requiring students to create a Quizlet account.
