

## Splash Math Requirements

1. Students must have a signed COPPA form giving consent, on file. The COPPA form is a form that is a part of their returning or new student registration through Powerschool Registration **only for paid subscriptions.**

### **Classroom Basic or Classroom Select Free Version:**

1. Teachers can login using school Google login or by creating an account.
2. Teacher adds students to classroom by providing first name, last initial or using the student's Twinsburg Network username as the first name. No last name is required.
3. No student accounts are created with the free versions (only the Classroom Premium and School/District paid subscription creates usernames and passwords for students)
4. Students access assigned activities by clicking on Go to Student Center at the top of the teacher's dashboard.

**CAUTION:** Teacher must be logged into splashmath in order for students to access their dashboards through the Student Center. Do not give your account information to each student! Log into your splashmath account on each computer yourself.

Also, after a student logs out of their dashboard, they have the ability to return to your dashboard. Make sure they don't!
