(4/3-4/6) Monday, April 8th, much of Ohio will experience a total solar eclipse between 3:13 and 3:17pm. This historic event has NOT been experienced here since 1806. Ohio will not see another until 2099! Be aware you can NOT look safely at the sun without proper solar eclipse glasses. According to the American Astronomical Society, a safe pair of solar eclipse glasses should be labeled ISO 12312-2. The glasses reduce sunlight to safe levels and block UV and infrared radiation. If you do not have solar eclipse glasses, you can view the eclipse safely by making a pin-hole viewing device out of a cardboard box.

Pay attention to the shadows, the changing light and realize your world will go completely dark for 4 minutes! Prepare your family, friends and pets. It will be a bit spooky.

Whatever you do, make a plan! The local population will likely triple and traffic will be thick. Get your errands done days in advance and have a full tank of gas in your car with food and water inside if you are traveling. Enjoy the day off from school and safely experience something you may never see again in your lifetime!
